SUSTAINABLE DEVELOPMENT

Our projects are carried out with constant attention to environmental protection: wall coverings are made from recycled and recyclable products, partition walls are made from panels of natural particle binders from eco-managed forests, visual prints use solvent-free inks, and lighting solutions have very low energy consumption.

Our teams are designed based on the needs and constraints of the location. We also strive to work with local suppliers to minimize CO² emissions and promote the local economy.

As part of events and exhibitions, we also design the stands to be stored and reused according to your requests.

AN ETHICAL COMMITMENT

One Sunday in November 2015, Easyraideuses ran in the name of L'Architecture Communicante in Ranakur (India).

Easyraideuses is a 100% women-led project that allows women to meet with communities in underprivileged areas worldwide, to run and leave a lasting impact through humanitarian actions for children.

Participants in this race brought many clothes, toys, and games,

which were distributed to different schools, orphanages, and dispensaries.

But this travel also allowed to fund the purchase of bicycles for students who live more than an hour's walk from school, school desks, and school supplies for four schools. All these purchases were made locally to support the local economy.

L'ARCHITECTURE COMMUNICANTE ACCOMPANIES YOU EVERYWHERE FOR YOUR EXHIBITIONS AND YOUR EVENTS
